

C.A.S/Frosty Commercial Refrigeration

PH: 8882Frosty(888-237-6789)

Basic Troubleshooting

1. Check Power Source – Ensure Unit is plugged in and turned on.
2. Check Water Supply – Ensure water is connected to unit and turned on.
3. Check Fittings – Check fittings for leaks, tighten fittings if leaks are present. If leaks persist shut water source off, turn off power and call service technician.
4. Check Filters – Ensure filters are installed properly and clean.
5. Check Air-Flow – Ensure unit has ample air flow around unit for cooling.
6. Check Doors – Ensure doors are properly seated.

If problems persist contact us at number above.
